REVISED ADVERTISEMENT.

A Dictionary of the Economic Products of India-By Dr. Geo. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

the Revenue and Agricultural Department.

The first five volumes and Vol. VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs. 45 in India, and 3 gaineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, Rs. 2-6 per volume. For copies bound in half calf or half morocco, Rs. 6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; (both chemical and industrial); trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact n important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Vol. II embraces the letter C in 689 pages; Vol. III contains the letters D, E, F and half of G.

Vol. IV latter half of G to middle of L; and Vol. V contains the latter half of L to end of O; Vol. VI, (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year; but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the vernacular and European names of the plants, animals and minerals of India, and as such will be a work of reference, which, it is hoped, may prove of considerable value.

No. L.A.-347, dated 31st October 1895.

From-The Auditors of the Accounts of the Corporation of Calcutta, To-The Municipal Commissioners of Calcutta.

WE have the honour to report that the cash accounts of the Corporation of Calcutta for the year ending 31st March 1895 have been audited on our behalf, and have been found

2. We have signed the printed statement of the annual accounts of the Corporation for the year 1894-95 in token of our having been satisfied with the audit exercised on our behalf, and we herewith transmit that statement, with a formal certificate that the accounts set forth in that statement have been correctly extracted from the books kept in the Accounts Branch of the Office of the Corporation.

3. We have at the same time to invite attention to the defects, detailed in the accompanying note, which exist in your accounts, and to the suggestions which, as noticed in

the note, were made in previous reports but have not yet been acted on.

We have, &c.,

G. E. MANISTY, Offg. Accountant-General.

J. A. ROBERTSON. Examiner of Local Accounts.

Note on the Audit of the Accounts of Calcutta Municipality for the year 1894-95.

THE following heads in the General Fund Ledger have been closed with the gross balances noted against each head :-

Debit balance.

		Rs.	A.	P.	
House drainage recoverable	451	23,011	3	2	
Health Department—Bustee drainage recoverable		15.089			

The details of these balances have been worked out and a statement prepared by the Account Department showing the difference between these balances and the balances as per miscellaneous bill register. That statement was submitted to the General Committee on the 20th July 1895, soliciting sanction to write off the differences between the general ledger and the miscellaneous bill register. The General Committee would not sanction the differences being written off, nor the details being finally dealt with until another attempt had been made to recover them by an officer to be specially deputed for that purpose. Up to the date of this note, however, no officer has been deputed, and the differences are still unadjusted. The cause of the excess in the ledger balances, which under the two heads amounts to Rs. 25,201-10-3, is that bills dating back as far as the year 1891 have from time to time been cancelled under the sanction of the Vice-Chairman, Chairman, and Commissioners, without being written off the accounts. In these circumstances, it is evident that the greater part of the difference must be irrecoverable, and that its retention on the books as a realisable asset is misleading. We would, therefore, recommend that a book adjustment be made charging the full difference to profit and loss. This will of course in no way prejudice the right of the Corporation to make any recoveries on the report of the officer deputed to investigate the claims. It will merely be necessary to prepare a list of these claims and credit the recoveries to profit and loss.

Credit balance.

Town Hall recoverable-Rs. 1,562-13-9.

The details have been worked out. Some of the items go back to 1893. The Secretary to the Corporation should now investigate each item, and adjust as many as possible during the year.

Oredit balance.

Interest on Contractors' Deposits-Rs. 4,564-4-1.

The details have been worked out and consist of 65 items. During the current year the Chief Accountant should adjust as many items as possible, so as to reduce the clerical labour of carrying forward details of so many accounts. Included in the above 65 items are 35 belonging to security deposits of employés. They should be transferred to a separate head styled "Security Deposits of Employés," to distinguish them from contractors' deposits.

General Deposit Account—Rs. 52,373-3.

There are 13 items of security deposit of employés included in this balance. They should also be transferred to the new head.

License Deposit Account-Rs. 423.

There are 4 items belonging to the year 1893, 1 item of 1892, and 2 items of 1891, included in this balance. The License Officer should be called upon to adjust these old items as soon as possible.

Contractors' Deposit Account, Government paper-Rs. 1,67,100.

Included in this balance, there are 40 items, amounting to Rs. 50,700 belonging to deposits of employés; they should be transferred to a new separate head "Security Deposits of Employés, Government Paper Account," and the Bank of Bengal should be requested to make the same transfer, and grant a separate receipt, to be headed "Security Deposit of Employés."

Water-rate Fund Ledger.—The Deposit Account in this ledger closed with a credit balance of Rs. 9,803-15-6 consisting of 423 items, extending back as far as the year 1886. The majority of the items composing this balance are for "deposits for water supplied for building and business purposes"

building and business purposes."

A fully detailed list of these 423 items should be forwarded to the Assistant Engineer in charge, Water-works, who should immediately supply the necessary information regarding those deposits on account of water supplied for building or business purposes, where the building has been completed or business stopped, so that this unwieldy balance may be The Chief Accountant should separate this account into three separate heads, as reduced. follows : -

(a) Deposits for water supplied for building purposes:
(b) Ditto ditto business purposes:

Earnest-money deposits, and the Assistant Engineer in charge, Water-works, should be instructed to see that when money is paid to the Municipal (c) Treasurer by his department on account of deposits, that the chalan clearly states whether the deposit is for (a), (b) or (c).

The Treasurer should also be instructed to clearly distinguish these deposits in his

accounts.

The Assistant Engineer in charge, Water-works, should be called upon to closely watch these deposits and prevent them from accumulating unnecessarily. As soon as a building is completed and the supply of water stopped, the deposit should be adjusted at once and not allowed to be unattended to for years.

Drainage Loan Fund Ledger.—The Deposit Account in the ledger closed with a credit balance of Rs. 388-1-1. A full detailed copy of this balance should be sent to the Chief Engineer, who should supply the necessary information to the Chief Accountant, to enable

him to adjust the amount.

The Advance Account in this ledger closed with a debit balance of Rs. 8-11-6. This is for advance made to the Superintendent of Stores. He should be called upon to adjust the

amount as early as possible.

Water-supply Loan Ledger.—The Advance Account in this ledger closed with a debit balance of Rs. 1,257-9-3. This is for advances made to Chief Engineer and Assistant Engineer to land water-pipes. A full detailed copy of this balance should be sent to the Chief Engineer, who should supply the necessary information to the Chief Accountant, to enable him to adjust this account.

The Suspense Account in this ledger closed with a credit balance of Rs. 882-3-9.

The Chief Accountant should ask the Chief Engineer whether the work for preparing plans, &c., for the riparian Municipalities has been completed, and if so, this amount should be transferred to "Water-supply Loan Miscellaneous Receipts."

Town and Bustee Improvement Ledger.—Rs. 118-0-6 have remained in deposit in this ledger since 1892. The Chief Accountant should adjust this amount during the current

year, if possible.

2. The ledger balance of the outstanding miscellaneous bills on the 31st March 1895 amounted to Rs. 62,245-12-10, and purported to be in the hands of the following officers of the Municipality :-

Name.		General Fund.	Water-rate.	Loan.	Total.		
Joint-Collector Warrant Officer Assessor Health Officer Engineer	::	Rs. A. P. 4,575 0 1 11,288 1 9 214 5 0 274 11 6 658 15 3 125 12 0	4,874 11 9 1,420 4 0 60 0 0	Rs. A. P. 15,015 9 7 14,398 14 0 598 13 5 5,572 4 6	Rs. A. 1 24,465 5 6 27,107 3 8 813 2 6 5,847 U 718 15 3,294 2		
Secretary Total		17,136 13 7		38,723 15 6	62,245 12 1		

The Personal Assistant to the Vice-Chairman has taken actual stock of the above bills, but departmental returns verifying these balances have only been given in the Administration Report by the Joint-Collector, Warrant Officer, and Assessor. No departmental return has been given by either the Health Officer or the Engineer. .In paragraph 7 of the note on the audit of your accounts for 1892-93, attention was

drawn to this defect, but it has not yet been remedied.

Out of 33 bills of the General Fund amounting to Rs. 274-11-6 in the hands of the Health Officer, only 3 originals and 2 duplicates amounting to Rs. 39-12-3 were produced before the Personal Assistant to the Vice-Chairman at the time of taking stock; and out of the balance 12 bills amounting to Rs. 187-1 could not be accounted for, but were stated to have been lost. This should be investigated and the officer who is responsible should either account for the bills, or make good the loss sustained by the Corporation.

The departmental returns of the Joint-Collector and the Warrant Officer agree with the

balance in the ledger, but the return from the Assessor differs as follows:-

Statement of miscellaneous bills disposed of in Assessor's Department during the year 1894-95, taken from page 55, paragraph 118 of Part I, Administration Report.

Balance out- standing on 31st March 1894. New bills received.		Total amount outstanding.	Amount returned.	Amount cancelled.	Total amount disposed of.	Balance out- standing on 31st March 1895.

should have been as follows:-

On account of-	Outstanding balance on 31st March 1894.	New bills received.	Total.	Amount returned to other officers.	Amount of bills cancelled.	Amount disposed of from deposit account.	Total.	Balance out- standing on 31st March 1895.

It will thus be seen that, with the exception of the opening balance, not a single column of the statement compiled by the Assessor's Bill Department agrees with the ledger balance. Care should be taken for the future to prevent this defect.

3. The comparison of the outstanding balance on account of the miscellaneous bills at the close of 1893-94 and 94-95 is as follows:—

The Joint-Collector should be asked to explain why he cannot collect the bills of 1892-93 and 1893-94, and failing to collect them, why he did not send them to the Warrant Officer before the 31st March 1895. No miscellaneous bills should remain in his hands for more than three months. If he cannot collect them within that period, he should send them to the Warrant Officer, with a report in each case, stating why the bill could not be collected. The Warrant Officer should be called upon to explain the reason why the bills for 1890-91, 1891-92, 1892-93 and 1893-94 were still uncollected on the 31st March 1895, and in all cases where he is of opinion that the bill cannot be realised, should forward it with a report to the Chairman for cancellation. The balances in the hands of the Assessor, Health Officer, and Engineer represent bills that have been returned to them for some reference. It is not recognised to be the duty of the officer who sends a bill to another department for reference, to watch and see that it is promptly returned, or an explanation of the cause of delay given; consequently the accumulation of unadjusted bills in the receiving department is unchecked.

A large number of bills are stated to be detained in the hands of Government and public offices. All such bills for 1893-94 and former years should be recalled, and each case gone into, to ascertain the reasons of detention for such long periods.

A considerable number of bills are stated to be in the hands of the Pleader, Small Cause Court, upon which decrees have been given, but still the demands are unrealised. These also should be recalled, and all claims prior to 1st April 1894, looked into, and then, if in the opinion of the Chairman they cannot be realised, they should be remitted. It

should be remembered that all outstanding bills are shown in the municipal accounts as a realisable asset, and if they are not or cannot be realised, but are simply carried forward from year to year, the assets become more or less defective and misleading.

4. The ledger balance of the outstanding consolidated rate-bills on the 31st March 1895 amounted to Rs. 5,88,846-4-2 in the hands of the following officers:—

				Rs.	A.	P.	
Collector			***	1,08,607	7	0	
Joint-Collector	 			28,475	9	9	
Warrant Officer	· · ·	•••		3,64,255	6	6	
Assessor	 		•••	87,507	12	11	
						-	
				5,88,846	4	2	

and the departmental returns from those officers agree with the balances in the ledger.

The Collector's balance of Rs. 1,08,607-7 includes bills to the extent of Rs. 25,786-9-9, stated to have been detained for various reasons in Government and public offices. To what period these bills belong, or for how long they have been detained in the offices referred to, is not stated. We would suggest that in future the Collector should show to what period, i.e., 1st, 2nd, 3rd, and 4th quarter of such and such a year, the whole balance in his hands refers, the absence of this information being a defect in his departmental return. We would also suggest that all Government or public offices, who have detained bills for more than three months, should be called upon either to pay or return the bills. In the latter case, the bills could then be handed over to the Warrant Officer for recovery by coercive measures, as in all other cases.

The terms of the Collector's contract are that he shall return all uncollected rate-bills within one week after the first presentation; it follows, therefore, that the balance in his hands ought to consist of bills of the last quarter only (all others having been passed on to the Warrant Officer), but in the absence of any information on this point in his departmental return, it is impossible to tell to what period the balance in his hands belongs. It also appears that no stock is ever taken of these outstanding rate-bills, or those in the custody of

the Joint-Collector.

For obvious reasons it is quite as necessary to take stock periodically of the rate-bills as of the miscellaneous bills, and we would, therefore, strongly recommend the introduction of this precautionary check. Similarly the Joint-Collector's balance of Rs. 28,475-9-9 includes bills to the extent of Rs. 1,851-10-9 detained in Government and public offices. These should be dealt with immediately under the three months' limit. The departmental return of this officer shows that although he is under the same obligation as the Collector tion, still on the 31st March 1895 he had in his own hands, exclusive of the bills detained in Government and public offices, bills for the 2nd and 3rd quarters of 1894-95 to the extent of Rs. 1,137-2, as follows: to return to the Warrant Officer all bills not collected within one week after first presenta-

He should be called upon to explain why these bills were still in his hands, and no

passed on to the Warrant Officer.

The departmental return of the Warrant Officer does not show clearly, year by year, how many years are included in his balance of Rs. 3,64,255-6-6. We would suggest this being done in the future, so that it may be seen at a glance how much of this balance will be barred by limitation each year and require to be removed from the list of realisable assets.

Similarly, the Assessor should show how many previous years' demands are included in

his gross balance at the end of each year.

5. The ledger balance of the outstanding arrear house-rate bills on the 31st March 1895 amounted to Rs. 933-2-11 in the hands of the Warrant Officer only. The departmental return of that officer agrees with this figure, but is defective in not analysing the years included in this balance. This should be done in future.

6. The ledger balance of the outstanding night-soil fees on the 31st March 1895 was

Rs. 691-15-2 in the hands of the Warrant Officer only.

The departmental return exhibits this figure, but does not analyse the years covered by this balance. This should be done in future.

7. The ledger balance of the outstanding arrear water, police and lighting-rate bills on the 31st March 1895 amounted to Rs. 611-12-9 in the hands of the Warrant Officer only. The same remarks apply to this return as to those under paragraphs 5 and 6 above.

8. The ledger balance of the outstanding market rent-bills on the 31st March 1895 was Rs. 4,786-9-3 in the hands of the following officers:-

Superintendent of M	arket-
---------------------	--------

For Municipal Market "Dhurrumtollah			Rs. 2,703 300	0 0	P. R 0 0	8. A	. Р.	A 25 A 54 A 54 A 52 A 52 A 52 A 52 A 52

					4,786	9	3	

and these figures agree with the departmental returns of those officers. The departmental returns, however, are defective in not analysing the balances, according to years, to show how much belongs to each year. This should be done in future.

During the year under audit, bills to the extent of Rs. 695-1-6 had to be cancelled as irrecoverable, as follows:—

Rs. A. P. 607 4 9 Out of the stock held by the Warrant Officer Market Superintendent ... 87 12 9 ,,,

9. During the year under audit 82 estimates for metal for road repairs, aggregating 227,000 cubic feet, valued at Rs. 33,445, were made out by the Road Department against a head called "Reserve Stock," instead of the name of the particular roads for which the metal was required being given on the estimates, as is customary in all other cases; 65 of these estimates were stated to be for town area and 17 for the added area.

Now, there is no such head as "Reserve Stock" in the accounts of the Municipality, and if there were, it would be a suspense head, and not an expenditure head. We would point out that it is irregular in any circumstances to make out estimates for final expenditure against a fictitious head. This practice should, therefore, be put a stop to at once, and all future estimates should be made out against the particular roads for which the metal is required. The practice also, which obtains at present, of allowing contractors and others to sign receipts for metal from the Store Department, without obtaining the countersignature of the Road Overseer, is open to grave objection, and we would strongly advise orders being issued at once, that in future all receipts, for anything received from the Store Department for roads, must be countersigned by the Road Overseers.

^{*} Old metal stated to be available.

The system at present in vogue in the Road Department of granting receipts to the Store Department in the month of March of each year for road metal that is not removed from the storeyards until after the financial year has expired, and charging the value of these nominal issues against the fictitious head "Reserve Stock," so as to prevent the road grants lapsing, is an irregular expedient for evading the natural operation of the Budget system which cannot be countenanced. No receipt for road metal should be granted by the Road Department to the Store Department until the metal has actually been removed from the storeyard and delivered on the road for which it is intended. If these were done, the contractor's receipt would certify that the metal had been received by him at the gate of the storeyard and the Road Overseer's countersignature on the some, that the contractor had delivered the metal on the road where it was wanted. The absence of this necessary safeguard makes it quite possible for fraud to be committed at any time. It should be the duty of the Superintendent of Stores to see that the countersignature of the Road Overseers is obtained on each receipt, and of the Road Superintendent that no receipts are granted without the metal being actually delivered at the site where it is wanted. If the repairs to any road cannot be completed within the financial year to which the grant refers, and the grant lapses, application in the usual manner should be made to have the grant re-sanctioned for the next year. Any other method of dealing with cases of this kind leads to confusion in the accounts, and opens wide the door to serious abuses.

10. In paragraph 16 of the note on the accounts of 1892-93, attention was drawn to the absence of stock lists from any of the departments of the Municipality, and again in paragraph 11 of the note on the accounts of 1893-94 this was repeated, with the addition that stock had not yet been taken for all the departments, and that in those cases where it had been taken, it was defective, as no transfer had been made to block. Very clear instructions were then given regarding any difficulty that might arise regarding valuation. We notice, however, that the suggestions have not been attended to during the year under audit. No returns have been received from either the Engineer or Health Officer's Department, or the departments subordinate to them. In those returns which have been received, a valuation is given in some instances, and in others left blank; some have been totalled and others not. Under these circumstances, it is quite impossible for the Chief Accountant to make any transfer to Block Account, and we must again point out that the early submission of these returns ought certainly to be required from all departments of the Municipality; that they should be prepared on a uniform plan, and that the valuation should be arrived at by either of the alternatives suggested in paragraph 11 of the note of last year, so that the Chief Account-

ant may make the necessary transfer before the end of the current year.

A Dictionary of the Economic Products of India.
By Dr. Geo. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Vol, VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of Superintendent of Government Printing, No. 8, Hastings Striet, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs. 45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, Rs. 2-6 per volume. For copies bound in half calf or half morocco, Rs. 6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact in important feature of the Dictionary consists in the fact that drived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.
